Target Audience: Nurses

This program will review the various classifications of Cardiac Pharmacology and how to apply to clinical application. The following objectives will be covered:

Learning Objectives

- This program will review the various classifications of Cardiac Pharmacology and how to apply to clinical application. The following objectives will be covered:
 - Name 3 classifications of cardiac medications and describe at least one clinical property associated with each.
 - Discuss precautions for use of dofetilide.
 - List 3 medications with potential for QT prolongation.
 - Describe 2 antiarrhythmic agents and selection criteria for each.
 - Discuss the cardiac properties of chronotropy, inotropy, dromotropy, and bathmotropy.
 - Describe the action of vasodilators.
 - Define preload, afterload and contractility.
 - Name 1 drug each that reduces preload, afterload and contractility and describe how each works.
 - Discuss the impact of sedative agents on arrhythmia management.

**Registration
Deadline
September 2, 2020**

Registration Fee: \$90.00

Fee waived for Consortium member when registered through Staff Development Director

Register online @
midcarolinaahec.org

Participants must attend 90% of the program in order to receive a certification of attendance. No partial credit will be given
